

DATA SCORING ANALYSIS

Unleash the power of telco data via our data-driven solutions and proprietary decisioning technology! Our Telco Data Scoring model and Fraud-Prevention tools enable Fis, Banks, and other financial service providers to take fast and efficient credit decisions, obtain qualified leads, and gather deep customer insights. We offer real-time API and/or web portal access for scoring to fit the business needs of every client.

Make fast credit and analytics decision in the Tap-and-Swipe era using FinScore's real time and on the go credit scoring tool, the ACE (Alternative Credit Evaluation) Scoring Portal.

- ✓ Break credit decisions limitations by using alternative data.
- ✓ Accurately manage risk by profiling profitable customers
- ✓ Assess borrower's creditworthiness in less than 30 Seconds

Be ahead of your competitors

Go deeper than the traditional scoring and embrace new opportunities with alternative data
